Ingredients that make **food better**

Bluecraft agro's food grade starch is a white or creamy granular powder that enhances the taste and texture of the food. It is used as a binder, emulsifier, and gelling agent in confectionery, instant food, sauces, snacks, canned food, etc. The starch enhances the taste, properties, and look & feel of food.

STARCH THAT MAKES YOUR
FOOD **TASTY & CRUNCHY**

FOOD GRADE STARCH

Food-grade starch, made from high-quality maize with exceptional brightness and low ash content is the ideal choice for the food industry. Available in white or creamy colours, the powder is free from rancidity, adulterants, pest infestation, and odour.

The food grade starch is produced through the wet-milling process that separates the kernel from the other maize crop components. In the process of extracting starch, all the layers-seed coat (bran), tip cap, and seed germ surrounding the kernel are removed.
